

PRODUCT PROFILE

Organic Biopesticide for IPM & Residue mitigation.

AVAILABLE PACKING

5.0l, 1.0l, 0.5l & 0.25l

NATURAL INSECTICIDE & MITICIDE

PRODUCT FEATURES

- A 100% Natural, Neem derived, Organic Ingredients based formulation.
- Derived from Cold Pressed Neem oil rich in Azadirachtins (up to 1500 ppm) and Synergistic Ingredients.
- Synergistic Formulation for Superior Bioactivity on Sucking and Defoliating Insect pests and Mites.
- Provides Multiple Modes of Action - Repellant, Antifeedant, Insect Growth Regulator and Reproductive suppressor.
- Effective Micro-emulsion formulation and improves Wetting, Sticking, Plant diffusion and UV stability.
- Ideal product for Organic applications and Pesticide tank mixing for improved Pest control.
- Improves Pesticide efficacy, prevents Pest Resistance and supports reduction of Crop Residues.
- Improves values of agricultural commodities by supporting Clean agriculture in Sustainable plantation crops and high value export crop commodities.

PRODUCT BENEFITS

- Natural Neem derived formulation for Organic and IPM programs.
- Ideal product for tank mixing application for improving pesticide efficacy, disrupt resistance and prevent chemical residues in crops.
- Supports clean and sustainable agriculture practices in plantation and high value crops.

PRODUCT USE RECOMMENDATIONS

- Apply 1 L/ 200-300 L water for low pest pressure situation.
- Apply 2 L/ 200-300 L water for high pest pressure situation.
- Apply 1-2 L/ Acre for low pest pressure in high density crops such as cardamom.
- Apply 2-4 L/ Acre for high pest pressure in high density crops such as cardamom where high spray volume is required.
- Apply 0.5-1 L/ 100-150 L water for young crops.

RECOMMENDED CROPS

- Rice, Vegetables, Fruit crops, Sugarcane, All Commercial row crops, Plantation crops including Cardamom etc.
- For usage on broad spectrum of field crops, specialty crops such as vegetables, fruits, greenhouses, ornamentals, nurseries, home & gardens, etc.
